

This bulletin provides information for our **Simulation Instructor Certification** program.

Details

<u>Certification</u>	<u>Description</u>	<u>Duration</u>	<u>Requirement</u>
SIC	Dynamic Force-on-Force Training	5 days	Prior training/experience

Content: Stress inoculation concepts, RBT principles, roles & responsibilities, safety in training, establishing a RBT facility & selecting gear, scenario design, conducting scenarios

This certification isn't limited to any particular product, methodology, operational environment, or force response option. A variety of products and methodologies are presented so participants are exposed to a range of ideas, with simulations presented across the complete force response continuum, enabling design and conduct of simulation training to suit specific agency and operational requirements.

Benefits

- Comprehensive and professional instructor programs
- Full colour manuals with detailed explanations and step-by-step visuals
- Provision of course administration documentation required to conduct training
- Customised training environment, allowing for safe, focused practice
- Qualified, experienced trainers with a positive attitude of shared professionalism

Requirements

- Instructor certification/experience (defensive tactics and/or firearms)
- Current license or equivalent agency certification/experience
- Operational competency (unarmed defence & control, handcuff, baton, spray, firearm, etc) *Note:* must be firearms certified to use firearms in exercises; candidates without firearms will be involved in intermediate force exercises only.

Preparation

These criteria are offered as guidelines for candidates to participate in the instructor certification. The final responsibility regarding the ability to participate in the program rests with each candidate.

- Average fitness level and can stand for extended periods
- Adopt alternate postures (i.e. kneel/prone/supine) and be able to rise unassisted
- Able to meet the program practical requirements, including active movement (running, falling, rising, etc) and dynamic engagement (defence, control, strikes, grapple, etc)
- Adequate grip strength to control duty gear and training equipment during application
- Participate safely and responsibly in drills and scenarios
- Hear training commands during RBT exercises

Candidates should ensure that they have a good understanding of use of force theory. It is recommended to engage in general fitness conditioning to prepare for the program. A liability release is to be completed by each candidate on commencement of the training program.

Equipment & Resources

We provide:

- Comprehensive training manual
- Administrative paperwork, equipment and venue costs

Candidate to provide:

- Duty uniform (operational or instructional attire)
- Shoes with good lateral/linear support and **non-marking soles**
- Duty rig (with holster/pouch for firearm, baton, handcuffs, torch, etc)
- NO live weapons or ammunition are to be brought to the course under any circumstances**
- Instructor equipment (whistle, clipboard, pen, etc, as appropriate)

Location

Modern Combatives Facility: 116 Northgate Drive Thomastown, Melbourne Victoria (MelRef: 9 C10)

Certification

This program presumes that candidates have undertaken prior use of force training, have operational experience relative to the course content, or have other appropriate background in combatives.

This is a competency-based program; mere attendance is no guarantee of certification.

During the program candidates will undertake a written theory assessment, practical skills evaluation and simulation evaluation. Competency in all components is required to successfully complete the program*.

The course aims to equip candidates with the skills and knowledge to present reality based simulation training to professional standards. It does *not* certify candidates to conduct instructor programs.

On successful completion, candidates will receive a *Simulation Instructor Certification*[†]. To maintain competency, instructors should be actively involved in conducting simulation training.

To reserve your place return the completed application form with payment. Please contact me if you have any questions. I look forward to seeing you on the course.

*Candidates are permitted 2 opportunities to complete the assessment tasks required for competency. Assessments attained during the course remain valid for 30 days post course completion. Candidates who fail to complete any required assessment resits within this period will not be certified at that time, and may choose to undertake the program again at their own expense. Any remediation required outside the scheduled course dates will incur a remediation fee, invoiced at an hourly rate.

[†]Completion of this certification does not guarantee *licensing* as an instructor. Instructors must comply with State requirements regarding licensing in all jurisdictions. All States require licence holders to be a fit and proper person, with restrictions on applicants for licences with convictions for certain offences. Some States also have requirements regarding industry experience as a prerequisite for licensing as an instructor. Check your local regulatory authority for specific details.
